In the originally published version of this manuscript, there were a handful of notation errors.

Specifically:

1. The abstract should read "...the uniqueness of gaussian extremals implies that V is σ-stable" instead of "...the uniqueness of gaussian extremals implies that V is σ-stable."
2. In Theorem 21: "R" was incorrectly used in place of the mathematical symbol for the set of real numbers $\mathbb{R}$.
3. In the final paragraph of the Proof following Theorem 21: an incorrect symbol was used in place of the 'different from' mathematical symbol $\neq$.
4. In Theorem 22, paragraph 6: "R" was incorrectly used in place of the mathematical symbol for the set of real numbers $\mathbb{R}$.

These errors have been corrected online.
